"I hope not!" Rather, his goal is to transfer the innovative spirit and built-in efficiencies of the mobile home production and delivery system to a full range of housing configurations. Bernhardt reached this conclusion only after overcoming an initial skepticism—he originally shared a widespread negative predisposition toward the mobile home industry. "This basic conclusion is the exact opposite of what I expected to find when I first looked at the mobile home industry years ago. Then, sharing with many others in the United States a strong bias against this industry, I decided to devote a few weeks to writing a negative case study on 'how notto industrialize the building industry.' One of the first findings of this investigation, however, was startling: The mobile home industry is the most efficient building industry in the world." The author then undertook a full-scale study of all aspects of the industry, in a seven-year project at MIT. He built a staff of more than a hundred professionals in such fields as engineering, economics, finance, law, management, political science, and sociology, scattered throughout the country. Supported by the U.S. Department of Housing and Urban Development (HUD), Bernhardt and his staff conducted thousands of surveys and interviews in all sectors of the building industry. The results of this massive study, compiled into a massive, five-volume, 1,800 page report to HUD. Bernhardt's up-to-the-minute book—which is richly illustrated with halftunes and drawings—condenses that report, and sets forth in a vigorous and explicit way the conclusions and recommendations that the full weight of the evidence compels. "Insider" patrol tactics you can start using right now to safely turn ordinary traffic stops into major felony arrests of drug couriers, gun traffickers and other violent criminals. Brings you step-by-step the rarely shared techniques of elite officers who are already producing spectacular results, while staying alive and legally unscathed. Once you learn the secrets of sensory pat-downs, deception detection, strategies for searches and single-officer self-defense, your vehicle stops will never again be the same. Government response to the first report of the Health Committee, HC 151-L, session 2009-10 (ISBN 9780215543004) Spies betray people. That's what we do. It becomes a - a habit. Difficult to break - even when it's not - not strictly necessary. Wormwood Scrubs Prison, London, 1961. One of Britain's most notorious double agents, George Blake, is serving a forty-two year sentence when he strikes up an unlikely friendship with Irish petty criminal, Sean Bourke. Both men are eccentric outsiders. Each sees in each other the possibility of escape and not just from prison. But once on the outside their mutual dependence faces mounting pressures from MI5, the KGB and indeed from themselves. Simon Gray's absorbing and deftly funny play explores how personal freedom is an illusion and how even friendship must have careful boundaries in a world where deception is a reflex response. Cell Mates premiered at the Yvonne Arnaud Theatre, Guildford, in January 1995 before transferring to the Albery Theatre, London. The play was revived at the Hampstead Theatre, London, in November 2017. Helps students to combine their knowledge of English with their technical knowledge. Covers all four skills through varied activities, with special emphasis on vocabulary acquisition and grammatical accuracy. Up-to-date technical content. Authentic reading and listening passages covering a wide range of topics, e.g. the use of virtual reality in industry, personal computing, viruses and security, information systems, and multimedia. Letter-writing section offering a complete guide to writing simple, work-related letters. Comprehensive glossary of technical terms which forms a useful mini-dictionary of computing terminology. Separate Answer Book with key to all exercises, the tapecripts, and useful unit-by-unit teaching notes. Designed for easy use by the non-specialistteacher. Former Toronto police chief William McCormack knows how ugly a homicide investigation can be. In ten years as a homicide detective, he investigated more than 100 homicides and came away with stories that range from grisly and bone-chilling to downright unbelievable -- and sometimes even comical. He shares some of Toronto's most famous murder cases, including the Scarborough Golf Club Road carby murder and the shootout involving a bad-check artist at the Royal York Hotel. The technical presentation of the material is enriched with enough detail to be suitable for academic use in residential construction, construction science, construction management, and building technology programs at universities and colleges while remaining clear enough to be a valuable resource for homebuilders and building code officials. Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather. Created by world-renowned programming instructors Paul and Harvey Deitel, Visual Basic 2008 How to Program, Fourth Edition introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object-oriented types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII. AUDIENCE:Appropriate for anyone interested in learning programming with Visual Basic 2008. It began as an intriguing piece of puzzle-solving - and ended with the discovery of the greatest secret of all. Dissatisfied with the explanations of previous researchers, Richard Andrews and Paul Schellenberger applied mathematical logic to the enduring mystery of the Rennes-le-Chateau and the 'treasure' alleged to be buried there. The quest began with an investigation into the activities of a group of 19th century priests who had become embroiled in the legend. These priests had grown rich because of their involvement and had maintained the anonymity of the paymasters, but in 1993 an extraordinary clue came to light which suggested the priests were engaged in activities at odds with traditional Roman Catholic pastimes. A series of paintings was unearthed which incorporated a suggested the priests were engaged in activities at odds with traditional Roman Catholic pastimes.
