X-Ray Line Profile Analysis in Materials Science Oct 11 2021 "This book aims to
synthesize the existing knowledge of the theory, methodology, and applications of x-ray
line profile analysis in real-world settings"--

The Medal Factory Mar 28 2023 43 Olympic medals. 6 Tour de France victories.
Countless world records and world championship victories. Since the year 2000, British
Cycling, Team Sky and INEOS have dominated the sport of cycling to an unprecedented
degree. But at what cost? Did Sir David Brailsford, Peter Keen and the other brains
behind British Cycling's massive and sudden dominance in the modern era find a winning
"Moneyball" formula? Or did their success come down to luck and personal chemistry?
Did this organisation, founded on relentless, ruthless efficiency contain contradictions
which threatened to overwhelm it, amid accusations of drug-taking, bullying and sexism?
The Medal Factory tells the full story from amateurish beginnings through a sports-
science revolution to an all-conquering, yet flawed, machine. Through interviews with
Brailsford and Keen, Shane Sutton, Fran Millar, Chris Boardman, Sir Chris Hoy and
many other key players, Kenny Pryde interrogates the parts of the story - lottery funding,
marginal gains - that we think we know, and reveals others that have remained hidden,
until now.

Nine Quarters of Jerusalem Oct 23 2022 'Original and illuminating ... what a good book
this is' Jonathan Dimbleby 'A love letter to the people of the Old City' Jerusalem Post In
Jerusalem, what you see and what is true are two different things. Maps divide the walled
Old City into four quarters, yet that division doesn't reflect the reality of mixed and
diverse neighbourhoods. Beyond the crush and frenzy of its major religious sites, much of
the Old City remains little known to visitors, its people overlooked and their stories
untold. Nine Quarters of Jerusalem lets the communities of the Old City speak for
themselves. Ranging through ancient past and political present, it evokes the city's depth and cultural diversity. Matthew Teller's highly original 'biography' features the Old City's Palestinian and Jewish communities, but also spotlights its Indian and African populations, its Greek and Armenian and Syriac cultures, its downtrodden Dom Gypsy families and its Sufi mystics. It discusses the sources of Jerusalem's holiness and the ideas - often startlingly secular - that have shaped lives within its walls. Nine Quarters of Jerusalem is an evocation of place through story, led by the voices of Jerusalemites.

Strongmen Sep 09 2021 'A gripping and illuminating picture of how strongmen have deployed violence, seduction, and corruption' Daniel Ziblatt, co-author of How Democracies Die 'A timely analysis of how a certain kind of charisma delivers political disaster' Timothy Snyder, author of On Tyranny Ours is the age of the strongman. Countries from Russia to India, Turkey to America are ruled by men who combine populist appeal with authoritarian policy. They have reshaped their countries around them, creating cults of personality which earn the loyalty of millions. And they do so by drawing on a playbook of behaviour established by figures such as Benito Mussolini, Muammar Gaddafi and Adolf Hitler. So why - despite the evidence of history - do strongmen still hold such appeal for us? Historian Ruth Ben-Ghiat draws on analysis of everything from gender to corruption and propaganda to explain who these political
figures are - and how they manipulate our own history, fears and desires in search of power at any cost. Strongmen is a fierce and perceptive history, and a vital step in understanding how to combat the forces which seek to derail democracy and seize our rights.

to be named after a fifteenth-century Flemish painter, and how his own youthful
experiences of fear led to his literary creation. Those who have followed the cases of this
tough cop more interested in justice than ambition will find much to enjoy and to ponder
in this behind-the-scenes account. “Connelly truly is one of the finest mystery writers.”

Comparing gene sequences, examining the atomic structure of proteins and looking into the geochemistry of rocks have all helped to explain creation and evolution in more detail than ever before. Nick Lane uses the full extent of this new knowledge to describe the ten greatest inventions of life, based on their historical impact, role in living organisms today and relevance to current controversies. DNA, sex, sight and consciousnesses are just four examples. Lane also explains how these findings have come about, and the extent to which they can be relied upon. The result is a gripping and lucid account of the ingenuity of nature, and a book which is essential reading for anyone who has ever questioned the science behind the glories of everyday life.

The Wordhord Jun 30 2023 An entertaining and illuminating collection of weird, wonderful, and downright baffling words from the origins of English—and what they reveal about the lives of the earliest English speakers Old English is the language you think you know until you actually hear or see it. Unlike Shakespearean English or even Chaucer’s Middle English, Old English—the language of Beowulf—defies comprehension by untrained modern readers. Used throughout much of Britain more than a thousand years ago, it is rich with words that haven’t changed (like word), others that are unrecognizable (such as neorxawang, or paradise), and some that are mystifying even in translation (gafol-fisc, or tax-fish). In this delightful book, Hana Videen gathers a glorious trove of these gems and uses them to illuminate the lives of the earliest English speakers. We discover a world where choking on a bit of bread might prove your guilt, where fiend-ship was as likely as friendship, and where you might grow up to be a laughter-smith. The Wordhord takes readers on a journey through Old English words and customs related to practical daily activities (eating, drinking, learning, working); relationships and entertainment; health and the body, mind, and soul; the natural world (animals, plants, and weather); locations and travel (the source of some of the most evocative words in Old English); mortality, religion, and fate; and the imagination and storytelling. Each chapter ends with its own “wordhord”—a list of its Old English terms, with definitions and pronunciations. Entertaining and enlightening, The Wordhord reveals the magical roots of the language you’re reading right now: you’ll never look at—or speak—English in the same way again.

High Profile Feb 21 2020 The murder of a notorious public figure places police chief Jesse Stone in the harsh glare of the media spotlight in this New York Times bestseller. When the body of controversial talk-show host Walton Weeks is discovered hanging from a tree on the outskirts of Paradise, Massachusetts, police chief Jesse Stone finds himself at the center of a highly public case, forcing him to deal with small-minded local officials and national media scrutiny. When another dead body—that of a young woman—is discovered just a few days later, the pressure becomes almost unbearable. Two victims in less than a week should provide a host of clues, but all Jesse runs into are dead ends. But what may be the most disturbing aspect of these murders is the fact that no one seems to care—not a single one of Weeks's ex-wives, not the family of the girl. And when the medical examiner reveals a heartbreaking link between the two departed souls, the mystery only deepens. Despite Weeks's reputation and the girl's tender age, Jesse is hard-pressed to find legitimate suspects. Though the crimes are perhaps the most gruesome
Jesse has ever witnessed, it is the malevolence behind them that makes them all the more frightening. Forced to delve into a world of stormy relationships, Jesse soon comes to realize that knowing whom he can trust is indeed a matter of life and death.

Chums Jul 08 2021 THE SUNDAY TIMES BESTSELLER AND TIMES BEST BOOK OF 2022 Power. Privilege. Parties. It's a very small world at the top. 'Brilliant ... traces Brexit back to the debating chambers of the Oxford Union in the 1980s' James O'Brien 'A searing onslaught on the smirking Oxford insinuation that politics is all just a game. It isn't. It matters' Matthew Parris 'A sparkling firework of a book' Lynn Barber, Spectator 'Exquisite and depressing in equal measure' Matthew Syed, Sunday Times Boris Johnson, Michael Gove, David Cameron, George Osborne, Theresa May, Dominic Cummings, Daniel Hannan, Jacob Rees-Mogg: Whitehall is swarming with old Oxonians. They debated each other in tutorials, ran against each other in student elections, and attended the same balls and black tie dinners. They aren't just colleagues - they are peers, rivals, friends. And, when they walked out of the world of student debates onto the national stage, they brought their university politics with them. Thirteen of the seventeen postwar
British prime ministers went to Oxford University. In Chums, Simon Kuper traces how the rarefied and privileged atmosphere of this narrowest of talent pools - and the friendships and worldviews it created - shaped modern Britain. A damning look at the university clique-turned-Commons majority that will blow the doors of Westminster wide open and change the way you look at our democracy forever.

Hogarth Jan 31 2021 THE SUNDAY TIMES ART BOOK OF THE YEAR A Sunday Times Best Paperback of 2022 Christie's Best Art Books of the Year 'Deft and richly detailed ... rescues the artist from John Bull caricature' - Michael Prodger, Sunday Times 'Marvellous ... a vivid and compelling reconstruction of the settings of Hogarth's life and artistic achievements, and of the nature of the man' - Professor Linda Colley, author of The Gun, the Ship, and the Pen 'Full of richness, originality and considered humour, unafraid to shock with thrilling new insight ... terrific' - Dr Gus Casely-Hayford, Director of V&A Stratford & Sky Arts 'The full technicolour panorama of Georgian life laid out in a huge and passionate book' - Lucy Worsley, Chief Curator at Historic Royal Palaces and author of Courtiers: The Secret History of the Georgian Court On a late spring night in 1732, a boisterous group of friends set out from their local pub. They are beginning a journey, a 'peregrination' that will take them through the gritty streets of Georgian London and along the River Thames as far as the Isle of Sheppey. And among them is an up-and-coming engraver and painter, just beginning to make a name for himself: William Hogarth. Hogarth's vision, to a vast degree, still defines the eighteenth century. In this, the first biography for over twenty years, Jacqueline Riding brings him to vivid life, immersing us in the world he inhabited and from which he drew inspiration. At the same time, she introduces us to an artist who was far bolder and more various than we give him credit for: an ambitious self-made man, a devoted husband, a sensitive portraitist, an unmatched storyteller, philanthropist, technical innovator and author of a seminal work of art theory. Following in his own footsteps from humble beginnings to professional triumph (and occasional disaster), Hogarth illuminates the work and life of a great artist who embraced the highest principles even while charting humanity's lowest vices.

Markets in Profile Aug 21 2022 Markets in Profile explores the confluence of three disparate philosophical frameworks: the Market Profile, behavioral finance, and neuroeconomics in order to present a unified theory of how markets work. The Market Profile is an ever-evolving, multidimensional graphic that gives visual form to the market's continuing auction process, revealing the myriad underlying dynamics that influence market activity. Behavioral finance posits that investors are driven more by emotional factors and the subjective interpretation of minutia than by "rationality" when making investment decisions. And neuroeconomics is the study of how investor psychology permeates and affects the financial markets. Mr. Dalton explicates the ways in which irrational human behavior influences the market's natural auction process, creating frequently predictable market structure, which results in opportunities for investors to ameliorate risk. The book will improve investors ability to interpret change in markets, enabling better, more confident investment decisions.

Tickets for the Ark Dec 25 2022 'A fascinating read for anyone interested in the future of the planet' Adam Hart, author and BBC science presenter Our planet hasn't seen the current rate of extinction since the demise of the dinosaurs 65 million years ago, and
global conservation efforts are failing to halt this. As a society, we face choices which will determine the fate of Earth's estimated 8.7 million species, including humans. As wildlife declines, conservation needs to make trade-offs. But what should we conserve and why? Are we wrong to love bees and hate wasps? Are native species more valuable than newcomers (aka invasives)? Should some animals be culled to protect others, and what do we want the 'natural world' to look like? There are many surprising answers in Rebecca Nesbit's lively, stimulating book, which sows the seeds of a debate we urgently need to have.

Guatemala Profile Dec 01 2020
VIP Jun 06 2021 The "VIP" is a user-friendly, point-in-time assessment tool which provides an 'at a glance' vocal profile for the clinician, voice coach and client. It examines the potential impact of a number of specific factors on the voice: general health; vocal history; vocal health; voice care; vocal status; voice genogram; anxiety and stress; social functioning; vocal demand; and environmental factors, and offers an overview of the theory to support this choice. The questions have been carefully designed to elicit easily-recorded information from the client about a range of factors that are known to affect vocal quality. The tick-box answers then translate into the Vocal Impact Profile, a visual presentation of the areas of greatest impact on voice. In addition to offering a point-in-time profile, the "VIP" may also be used as a template for achieving change in a specific area of vulnerability and provide a robust visual reinforcement of that change over time. It is, therefore, helpful as a therapy-monitoring tool and as an evaluation of client awareness, behavioural change and clinical effectiveness. Self-administered by the client, the questionnaire should take approximately ten to fifteen minutes to complete. The clinician or voice coach enters the responses into the computer programme (supplied on downloadable resources) or transfers them manually on to the hard copy thus offering a clear visual representation of the results. Worked examples of the VIP are included, presenting six clients with very different aetiologies and with a range of vocal problems. These examples clearly demonstrate the value of the Profile and its visual impact. As a clinical tool the "VIP" provides a subjective qualitative measure, which may be used as an adjunct to other assessment procedures. In addition, it provides a concrete method of determining and ordering the factors to be targeted in terms of therapy or voice work. Using the "VIP" should shorten the time necessary for completion of case history in the case of a voice therapy client, and, when used by a voice coach, the profile will identify areas for further discussion. The Profile is not time-sensitive so it may be repeated to evaluate client awareness of vocal change and implementation of agreed strategies. The "VIP" provides the clinician or voice coach with an efficient and effective means of auditing the therapy or coaching process and promotes a holistic partnership model of intervention.

Spike Feb 24 2023 SHORTLISTED FOR THE ORWELL PRIZE FOR POLITICAL WRITING 2022 THE TIMES SCIENCE BOOK OF THE YEAR A GUARDIAN BEST POLITICS BOOK OF THE YEAR A TOP 5 SUNDAY TIMES BESTSELLER *Revised and updated edition with new chapter reflecting on the impact of Covid-19 two years on, and what come next* Did the UK government really 'follow the science' throughout the Covid-19 pandemic, as it claims? As head of the Wellcome Trust, Jeremy Farrar was one of the first people in the world to hear about a mysterious new disease in China - and to learn it could readily spread between people. A member of the SAGE emergency committee, Farrar was a key figure in both the UK and the World Health Organization at the onset of the Covid-19 pandemic amid great uncertainty, fast-moving situations and missed opportunities. Spike is his widely acclaimed inside story. His account casts light on the UK government's claims to be 'following the science' and is informed not just by
Farrar's views but by interviews with other top scientists and political figures. **The Web of Meaning** Mar 16 2022 A compelling foundation for a new story of interconnectedness, showing how, as our civilization unravels, another world is possible. Award-winning author, Jeremy Lent, investigates humanity's age-old questions—Who am I? Why am I? How should I live?—from a fresh perspective, weaving together findings from modern systems thinking, evolutionary biology, and cognitive neuroscience with insights from Buddhism, Taoism, and Indigenous wisdom. The result is a breathtaking accomplishment: a rich, coherent worldview based on a deep recognition of connectedness within ourselves, between each other, and with the entire natural world. As our civilization careens toward a precipice of climate breakdown, ecological destruction, and gaping inequality, people are losing their existential moorings. Our dominant worldview of disconnection—which tells us we are split between mind and body, separate from each other, and at odds with the natural world—has passed its expiration date. Yet another world is possible. The Web of Meaning offers a compelling foundation for the new story that could enable humanity to thrive sustainably on a flourishing Earth. It's a book for everyone looking for deep and coherent answers to the crisis of civilization.
